THE LAUNCHBOARD

Actionable Student Data in One Place

The LaunchBoard is a statewide data system supported by the California Community Colleges Chancellor's Office and hosted by Cal-PASS Plus, California's free, intersegmental longitudinal student achievement data system. It provides progress, employment, and earnings outcomes data for students' educational pathways to offer users a more holistic view of student progress.

Designed in consultation with college administrators, deans, institutional researchers, faculty, technical assistance providers, and policymakers, **the LaunchBoard helps facilitate local, regional, and statewide conversations about student success and economic mobility.** The system contains data from the Chancellor's Office MIS system, employment and earnings records, Career Technical Education (CTE) Outcomes Survey responses, labor market information, and Comprehensive Adult Student Assessment Systems (CASAS) records.
